NUTR*4900 (Section 01): Selected Topics in Human Nutrition (.50 credits) Physical Activity and Sedentary Behaviours: Prevalence, Trends, and Patterns

Winter 2014 Course Syllabus

Department of Family Relations and Applied Nutrition University of Guelph

Instructor:

Dr. John Dwyer, PhD (Psychology)

Office: Macdonald Institute Building, room 227B

Telephone: 519-824-4120, ext. 52210

Email: dwyer@uoguelph.ca

Office hours:

Tuesday or Thursday, by appointment

Course format:

Expected enrolment is approximately 20 students. The course entails readings and discussion on the course topic, student presentations (in small groups and/or individually, depending on student enrolment), a written critique of an article, and a comprehensive literature review.

Class times:

Tuesday and Thursday, 10:00 - 11:20 am, Macdonald Institute, room B17

Course website:

Announcements, updated schedules, grades, and other information will be posted on CourseLink, a website for oncampus courses: https://courselink.uoguelph.ca/shared/login/login.html.

Course description:

This undergraduate course examines the prevalence, trends, and patterns of physical

activity and sedentary behaviours.

Prerequisite(s): FRHD*3070 (Research Methods: Family Studies)

NUTR*4010 (Nutritional Assessment)

Restrictions:

Registration in B.A.Sc. Applied Human Nutrition major

Specific learning objectives for students:

- 1. To discuss specific physical activity and sedentary behaviours issues during in-class activities.
- 2. To critically appraise empirical articles in peer-reviewed journals.
- 3. To synthesize results in empirical research articles during oral and written literature reviews.
- 4. To effectively communicate (orally and in writing) critiques of scientific research during student presentations and written assignments.
- 5. To facilitate discussion of a research article.
- 6. To provide constructive feedback on classmates' presentations.

Academic misconduct:

The University of Guelph is committed to upholding the highest standards of academic integrity and it is the responsibility of all members of the University community (faculty, staff, and students) to be aware of what constitutes academic misconduct and to do as much as possible to prevent academic offences from occurring. University of Guelph students have the responsibility of abiding by the University's policy on academic misconduct regardless of their location of study; faculty, staff and students have the responsibility of supporting an environment that discourages misconduct. Students need to remain aware that instructors have access to and the right to use electronic and other means of detection.

Please note: Whether or not a student intended to commit academic misconduct is not relevant for a finding of guilt. Hurried or careless submission of assignments does not excuse students from responsibility for verifying the academic integrity of their work before submitting it. Students who are in any doubt as to whether an action on their part could be construed as an academic offence should consult with a faculty member or faculty advisor.

The academic misconduct policy is detailed in the undergraduate calendar: http://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-amisconduct.shtml.

The Learning Commons' academic integrity tutorial, which includes a plagiarism module, is available at http://www.academicintegrity.uoguelph.ca/.

Evaluation:

Method	% of final grade	Date
Oral:	T	I 7 22 E 1 12
Critique of assigned reading in course schedule table (also see	15	Jan. 23 – Feb. 13
Appendix A)		
Facilitate discussion for critique of assigned reading in course	5	Jan. 23 – Feb. 13
schedule table (also see Appendix B)		
Partial literature review (see Appendix A)	20	Feb. 25 – Apr. 3
Meaningful participation in class discussions (not mere attendance)	20	Ongoing
Written:		
Critique of "common" assigned article (reference is in the syllabus)	10	Due Feb. 13 (in class)
(see Appendix C)		
Comprehensive literature review paper (see Appendix D)	30	Due Apr. 3 (in class)

Grading system:

The grading system described in the undergraduate calendar will be used. The grading system is as follows:

Letter grade 2% of the second	Petionetalie	
A+ 90-100 4	C +	67 – 69
A 85-89	C	63 – 66
'A	C -	60 – 62
B+ 77:-79	D.+	57 – 59
B 73-76	D	53 – 56
B= 170=72	D -	50 – 52
	F	0-49

Protocol:

- It is important that you attend classes regularly and complete the readings to do well in this course.
- Meaningful participation in class discussions contributes to learning so you are expected to attend classes and
 participate in discussions. All of us share the responsibility of creating an environment that facilitates class
 discussions. You are expected to come to class prepared to ask discussion questions and to comment on
 questions raised by the presenters and discussants.
- You will provide anonymous feedback for the student presentations (see Appendix E).
- Please come to class on time, turn off your cell phone, and refrain from conversations with your classmates
 during class. These activities disrupt class, making it difficult for your classmates to focus on the information
 presented. So please be considerate of others.
- The electronic recording of classes is expressly forbidden without the prior consent of the instructor. This prohibition extends to all components of the course, including but not limited to lectures and seminars, whether conducted by the instructor, seminar leader, or other designated person. When recordings are permitted, they are

solely for the use of the authorized student and may not be reproduced, or transmitted to others, without the express written consent of the instructor.

- I anticipate that the small groups will function well and that group members will contribute substantially. However, if there are group conflicts and they cannot be resolved within the group, then arrange a meeting with me to discuss the matter.
- As per university regulations, all students are required to check their <uoguelph.ca> e-mail account regularly: e-mail is the official route of communication between the University and its students.
- Information about what you should do if you are unable to complete course work because of medical, psychological or compassionate circumstances is given in the undergraduate calendar, in the "academic consideration, appeals and petitions" section. If you are not able to meet an in-course requirement due to illness or compassionate reasons, please inform me (or other designated person) in writing (include your name, mailing address, and e-mail address). Where possible, this should be done in advance of the missed work or event. If this is not possible, this should be done as soon as possible after the due date, and certainly no later than one week. If appropriate documentation of your inability to meet the in-course requirement is necessary, I (or other designated person) will request it of you.
- The last date to drop one-semester courses, without academic penalty, is March 7.

Readings:

The readings for each week should be read before coming to class so that you are prepared to participate in class discussions. Bring your readings to class.

The journal articles (i.e., readings) are available through the library via e-journals: http://www.lib.uoguelph.ca/.

Writing Services at U of G has various resources that you may find helpful (e.g., handouts re: grammar and style, writing a literature review, using a scientific journal article to write a critical review, plagiarism and academic integrity, APA style referencing, etc.): http://www.lib.uoguelph.ca/assistance/writing_services/.

Course components:

1. Oral critique of assigned reading (i.e., reading in course schedule table)

You will be given time to create your own group during the first week of classes. After this, I will assign students who are not in groups to specific groups. Then, I will randomly assign groups to specific dates for student presentations.

Student enrolment will be considered to determine whether student presentations will be in a small group (and the group size) and/or individually, the number of presentations, and the duration of presentations. I appreciate your flexibility on this.

Considering current student enrolment, it is expected that some students will form pairs to present and that other students will present individually. In general, there will be 2 presentations per class. There is a maximum of 20 minutes for each presentation (this allotment includes time to answer questions from classmates and me).

 You will have the opportunity to answer questions when a classmate facilitates discussion related to your assigned article.

You will critically appraise the assigned research article. In preparing the presentation, you are expected to seek out background information necessary to understand the article (e.g., supplementary data linked to the article; previously cited studies; websites), to be able to explain the research methods and results to the class, and to answer questions concerning the article.

Email your Microsoft PowerPoint presentation to me by 10:00 a.m. one day before the presentation.

- Use this software to ensure compatibility with my Mac laptop (for you to use in class). Using other software may distort your slides.
- Submit your slide show in Dropbox in CourseLink.

• There will be a 10% (out of 100) penalty for late submissions. I will email you to confirm that I received your presentation.

Your emailed presentation will be considered the final presentation to be downloaded on my Mac laptop, which I will also use to print a hard copy of slides that I can review prior to class. Therefore revised presentations will not be accepted after the initial submission.

- Ensure that all of your material on each slide is visible so that I can print a hard copy of slides properly (e.g., clipart should not cover text).
- Dr. Michelle Edwards (Data Resource Centre, Library) has generously offered to provide statistics consultation to students in this course. I strongly encourage you to make an appointment with her (edwardsm@uoguelph.ca) if you want assistance to enhance your understanding of the statistics used in the assigned article. She will not provide consultation on research methodology. If you obtain statistics consultation from Dr. Edwards, then acknowledge her assistance on a specific date on your first slide (i.e., title slide that references the article, lists the presenters, etc.).
- Your final slide should briefly list each group member's contribution to developing and delivering the
 presentation. This is for my review only (don't show this slide in class).

2. Facilitate discussion for critique of assigned reading (i.e., reading in course schedule table

Considering current student enrolment, it is expected that some students will form pairs to facilitate (same partners for oral critique of assigned reading) and that other students will facilitate individually. In general, there will be 2 discussions per class. There is a maximum of 10 minutes to lead class discussion of the research article previously critiqued.

- This time allotment doesn't include time allotted to the presenter to also answer questions.
- Discussants are encouraged to meet with the presenters when preparing for facilitation.

The role of the discussant is to facilitate a deeper discussion of key issues from the article. Facilitate discussion of 2 key issues related to methods (e.g., sampling, research design, and measurement).

Email your Microsoft PowerPoint slides to me by 10:00 a.m. one day before the class.

- Submit your slide show in Dropbox in CourseLink.
- There will be a 10% (out of 100) penalty for late submissions. I will email you to confirm that I received your slides.

Your emailed slides will be considered the final slides and therefore revised slides will not be accepted after the initial submission.

3. Written critique of "common" assigned article

Each student will independently critically appraise the following journal article:

Plotnikoff, R. C., Trinh, L., Courneya, K. S., Karunamuni, N., & Sigal, R. J. (2011). Predictors of physical activity in adults with type 2 diabetes. American Journal of Health Behavior, 35(3), 359-370:

Critiquing the article includes critiquing the research methods (e.g., sampling, research design, and measurement), describing and interpreting the main results, etc.. Discuss the strengths and limitations of the research.

Complete the critique independently. Don't collaborate on the critique (it is not a group effort).

Checklist for the critique:

- Maximum of 5 pages (if more than 5 pages are submitted, only the first 5 pages will be graded)
- ☑ Should **not** have a title page and reference section
- ☑ Use the following headings (introduction; sample; measures; research design; procedure; results and discussion)
- ☑ Your name and page numbers are in the header of the document

◩	Printed	on	1	side	of	page
---	---------	----	---	------	----	------

☑ 8.5" x 11" paper

☑ Double-spaced

☑ 2.5 cm. margins

☑ 12-point font size

✓ Not stapled (using a paper clip is fine)

BOTH a paper copy and an electronic copy of the critique are due by Feb. 13, 11:20 am. Late submissions have a 10% (out of 100) per day penalty.

- When you submit your paper copy, sign a form that will be available to ensure that you are given marks for completed work.
- Submit the electronic copy (Microsoft Word) in Dropbox in CourseLink.

4. Comprehensive "traditional narrative" literature review paper (term paper)

Each student will independently write a term paper on a selected research question related to the prevalence, trends, and patterns of physical activity and sedentary behaviours (i.e., so these behavioural outcomes).

• The topic cannot be research focusing on interventions (it's not the focus of this course).

After browsing some of the literature to identify possible more-specific research questions of interest (rather than a research question that is too broad), make an appointment with me to discuss the research questions that you're interested in, to review some abstracts that you have retrieved, and to **obtain required approval of the research question.** This will ensure different topics among the student presentations.

- Your topic should be approved by Feb. 6.
- Research questions will not be approved via email.

As a comprehensive literature review, the term paper should thoroughly describe the body of knowledge about your research question. Ensure that you include more-recently-published, "primary" (original) journal articles to adequately address your research question. Also, articles will need to be reviewed to provide the rationale for your research question in the introduction of the term paper, etc.. Critique as many articles as required to review the literature comprehensively. Integrate the research findings from the journal articles and don't simply do a critical appraisal of each article separately. **Therefore, the term paper should not include tables**.

The University of Guelph may not have all the articles that you require for your term paper. Therefore, you may need to obtain articles that are central to your research question through inter-library loan: http://www.lib.uoguelph.ca/services/borrowing/interlibrary loan/. Allow adequate time for ordering articles.

The term paper should include an introduction (including your research question), strengths and limitations of the research, a summary of the main findings, implications of the results, conclusions, and your suggestions for future research. Paraphrase rather than quote extensively. Use headings and sub-headings to organize your report and include page numbers.

Use the style in the American Psychological Association's (2010) publication manual of the American Psychological Association (APA) (6th ed.) for citing references in the body of the term paper and for listing references (see the following resource at Writing Services at U of G: http://www.lib.uoguelph.ca/assistance/writing_services/resources/handouts.cfm). You don't have to use the APA style for writing other elements of the term paper.

- ☑ *Maximum of 12 pages (if more than 12 pages are submitted, only the first 12 pages will be graded)
- ✓ *Should have a title page, reference section (use single space for the reference section), and appendix that shows the abstract linked to each "primary" journal article reviewed in your term paper
- ☑ Your name and page numbers are in the header of the document
- ✓ Put your home mailing address on the title page so I can return the term paper at the end of the semester

abla	Printed	on	1	side	of	page
------	---------	----	---	------	----	------

☑ 8.5" x 11" paper

☑ Double-spaced

☑ 2.5 cm. margins

☑ 12-point font size

✓ Not stapled (using a paper clip is fine)

Note: *The page limit does not include the number of separate pages for the title page, the reference section, and the appendix.

Complete the term paper independently. Don't collaborate on the term paper (it is not a group effort).

BOTH a paper copy and an electronic copy of the term paper are due by Apr. 3, 11:20 am. Late submissions have a 10% (out of 100) per day penalty.

- When you submit your paper copy, sign a form that will be available to ensure that you are given marks for completed work.
- · Submit the electronic copy (Microsoft Word) in Dropbox in CourseLink.

5. Oral presentation re: partial literature review

You will present individually. In general, there will be 2 presentations per class. There is a maximum of 30 minutes for each presentation (this allotment includes time to answer questions from classmates and me).

Student enrolment will be considered to determine the number of presentations and the duration of presentations.

Present on the same research question that was approved for your term paper.

Summarize and critically appraise 3 "primary" journal articles published in the last 5 years. None of these 3 articles should be from the list of assigned readings. Also, the 3 articles should be authored by different researchers. Integrate the research findings from the journal articles and don't simply do a critical appraisal of each article separately. The presentation can include tables. In preparing the presentation, you are expected to seek out background information necessary to understand the selected topic (e.g., supplementary data linked to the article; previously cited studies; websites). Also, facilitate discussion of key issues related to methods (e.g., sampling, research design, and measurement).

Email your Microsoft PowerPoint presentation to me by 10:00 a.m. one day before the presentation.

- Submit your slide show in Dropbox in CourseLink.
- There will be a 10% (out of 100) penalty for late submissions. I will email you to confirm that I received
 your presentation.

Your emailed slides will be considered the final slides and therefore revised slides will not be accepted after the initial submission.

• If you obtain statistics consultation from Dr. Edwards, then acknowledge her assistance on a specific date on your first slide (i.e., title slide that references the article, lists the presenter, etc.).

Course schedule:

I reserve the right to revise the schedule of classes as needed, as long as you are given adequate notice. If class is cancelled (e.g., bad weather), all remaining presentations will be shifted (e.g., cancelled presentation will be the next presentation).

Jan. 6, 2014 Appendix A NUTR*4900 (W14) - Evaluation of: ☐ Oral Critique of Assigned Reading Oral Presentation re: Partial Literature Review (page 1 of 2) Date: Presenter(s): _ CONTENT 1. Introduction 10 Gives appropriate introduction. Sets Dull opening. Partial or no introduction. No rationale given. the stage for what is to follow. 2. Content 19 18 Treated in some depth. Critical Superficial. Lack of critical thinking demonstrated. Evidence of thinking. Poor synthesis/integration. Important synthesis/integration. Important points lacking. Uninteresting. points stressed. Interesting. Logical Poor flow. Disorganized. flow. Organized. 3. Understanding 13 12 10 Unclear, confused. Some Understanding of topic and article(s) inaccuracies. Difficulty answering is clear. Makes accurate statements.

4. Summary/Conclusion

Answers questions well.

Appendix D NUTR*4900 (W14) - Evaluation of Comprehensive Literature Review Paper

Student:		
Studenti	 	

	Marcon conservation of the second
Component	% 6
The objective (or purpose) of this paper is stated in specific terms. It is clear which aspects of the problem will be considered. It is sufficiently restricted to permit analysis in some depth. The meanings of terms or concepts which are central to this paper have been clearly explained; definitions given.	/5
The review of literature provides a synthesis of relevant material, ideas are well understood; and information has been used accurately. Discussion of the studies is integrated. It has been structured to be consistent with the scope of the topic; shows some breadth of coverage of topic, as well as depth.	. / 20
The sources of information were most appropriate for problem chosen. Maximum use was made of primary sources. Sources were sufficient for this project.	/ 10
Critical appraisal of the literature is well done with a thorough discussion of the strengths and limitations of the studies.	/ 25
Recommendations for future research are appropriate.	/5
Organization, presentation, and composition. Skillful, pleasant, and easy to read. Paragraphs develop logically. Meanings are clear. Sentence structure is concise, grammatically correct, and cohesive. Minimum use of extraneous or repetitious material. Systematically using subheadings. Ample margins allowed. References are easy for the reader to find and follow. No spelling or punctuation errors. References are cited correctly, following the APA style.	/30
Recommendations for health professionals are clear and based on the review.	/5
Potal substitution of the property of the prop	//100%
